### Tools & Platforms

Git, GitHub, Figma

## Selected Projects:

### 1. File Recovery App

- GitHub: [File Recovery App](#)
- Description: A desktop application that recovers files from flash drives or other types of drives. Implemented a user interface that allows users to select specified file types for recovery.

### 2. Four Pics One Word (Clone)

- GitHub: [Four Pics One Word \(Clone\)](#)
- Demo: [Four Pics One Word \(Clone\) Demo](#)
- Description: A mobile game application developed using React Native, inspired by the popular game "4 Pics 1 Word" that I used to play during my teenage years.

### 3. My Portfolio Website

- GitHub: [Lerry's Portfolio](#)
- Website: [Lerry's Portfolio](#)
- Description: A personal website showcasing my work and projects. Built using Node.js, MongoDB, HTML, JavaScript, and CSS.
